We have a new range of super quality low cost microscopes:

### **XYL-606 Biological Epi-Fluorescence Microscope**

Conventional configuration has 5 wave bands, and B, G, BV, V, U can be switched. Also provides conventional transmission observation **\$3,960** [Click here for more details](#)

**XSZ-608 MULTI-VIEWING MICROSCOPES** are designed for several people to observe one specimen together at the same time. It has infinity imaging system, high light illumination and provides sharp & clear images. Particularly suitable for discussion in Clinic, Research and Teaching. **\$1,990 with three binocular heads or \$2,120 with four binocular heads** [Click here for more details](#)

### **XSZ-148F2LED with Cursor(Pointer):**

In order to make discussion convenient between teacher and students, the microscope is equipped with LED Arrow cursor pointer to indicate image in the viewing field, and a light intensity adjustment button is provided. The pointer can be moved freely and any position on the image can be indicated. **\$1,620** [Click here for more details](#)

**XP-607LP Transmission & Reflection polarizing microscope** is a professional laboratory instrument for non-transparent or translucent objects. For both transmission and reflection polarizing observation. Allows single-polarized light observation, orthogonal polarizing observation, cone-ray observation and microscopic photography. It can also be configured for attachment like test piece Gypsum  $1\lambda$ , Mica  $1/4\lambda$ , quartz wedge and mechanical stage. **\$3,230** [Click here for more details](#)

### **XJP-158J Metallurgical microscope**

An advanced Metallurgical microscope, for both reflecting and transmitted illumination. Bright & Dark field, DIC and Polarizing observation can proceed under reflecting illumination, and Bright field observation is done under transmitted light. **\$3,215** [Click here for more details](#)

**XJP-405 industrial microscope** is equipped with a large moving range mechanical stage, Epi-illuminator, long working distance bright and dark field Infinite Plan objectives, wide field eyepiece with clear images and good contrast. Bright & Dark field observation, EPI-polarizing and 10x DIC observation **\$6,600** [Click here for more details](#)

**MDS-200 INVERTED BIOLOGICAL** microscope , with trinocular head and plan objectives **\$2,105** [Click here for more details](#)

special offer on our **FISH plus CAMERA** package

Please click [HERE](#) for information

Also Videotest software – **MORPHOLOGY LITE** -- automatic objects selection by colour or brightness - object classification library - powerful statistics and graph plotting - advanced image stitching - 3D visualization - brightness profiles analysis **\$1,865-00**
